

ISHITA KHANNA

Data Analyst | Insights and Reporting

I think in patterns. Give me a spreadsheet, a dashboard or a half-finished dataset, and I'll find you the story worth acting on.

R | Tableau | Power BI | SQL | Databricks | CRM and Marketing

0481 862 931 · ishitakhanna2208@gmail.com · Melbourne, VIC · [Portfolio](#) · [LinkedIn](#)

Career Profile

- **Data Analyst** with a Master of Business Analytics (Monash University), with hands-on experience in CRM data quality and segmentation (Comprara) and e-commerce analytics (co-founder, Mysticase)
- **CRM data analysis and segmentation:** supported a CRM data quality project, consolidating 17,554 company records to 11,749, linking 38,171 contacts to the correct company, analysing and building industry and job-role segmentation for campaign targeting.
- **Trend and pricing analysis:** analysed seasonal demand and product performance using Etsy Analytics, Google Trends and Tableau; listing views up 43%.
- **Forecasting:** built predictive models in R and Python projecting housing and homelessness demand to 2040 (Walsall Council project).
- **Reporting and automation:** interactive dashboards in Tableau, Power BI and R Shiny; automated data cleaning and classification in KNIME, Excel, Keap and Zapier.

Core Competencies

- **Data Analysis & Visualisation** – R, R Shiny, SQL, Tableau, Power BI, Python, Excel
- **Machine Learning & GenAI** – Big data analysis, Generative AI, Predictive Modelling, Data Wrangling, Claude, Cursor
- **Database** – MySQL, SQL Server, Supabase
- **Programming & Automation** – HTML, CSS, KNIME, Zapier, Keap, Workflow Automation
- **Cloud Computing & Version Control** – Databricks, Posit Cloud, Data Warehousing, Vercel, Git, Github
- **Productivity & Collaboration** – Google workspaces, CRM Management, Process Documentation, Trello, Notion, Microsoft Office, Quarto
- **Domain Knowledge & Professional Skills** – Business Analysis, Financial Modelling, Customer Data Analytics, Insights and Reporting, Segmentation Analysis, Supply Chain, Campaign Analysis, Statistical Analysis, Stakeholder Engagement, Data Storytelling, Cross-industry Adaptability

Work Experience

Customer Data Analyst

August 2025 – May 2026

COMPRARA PTY LTD

Excel, SQL, R, Tableau, Power BI, KNIME, Keap CRM, Zapier

- Company and contact data in the CRM (Keap) came from four sources (imports, Seamless.AI syncs, APIs and manual entry), and 17,554 company records held duplicates, inconsistent naming and unclassified entries, limiting segmentation and campaign targeting.
- As sole analyst, supervised by the CEO, owned the analysis, design and validation of a company and contact consolidation and an industry, sector and job-role segmentation.
- Profiled the data with SQL and R, designed rule-based matching with lookup tables and a multi-layer classification validated through iterative reviews with the data analytics team.
- Automated the cleanup and classification process in KNIME, Keap and Zapier so new contacts classify automatically across all four sources, and tracked results in Tableau and Power BI.
- Improved campaign precision and scalability by delivering clean, consistent segmentation inputs and documenting end-to-end processes for long term use.
- Cut company records to 11,749 (–33%), linked 38,171 contacts to the correct company (71.6% of the CRM), improved match accuracy by 26% and reduced unclassified records by over 60%, with the rules and workflow documented for handover.

Marketing and Data Analyst

March 2024 – October 2025

MYSTICASE

Etsy Analytics, Google Trends, Tableau, R Shiny

- Co-founded an Etsy-based phone case brand with a business partner, in a market with seasonal, changing demand.
- Responsible for the data-driven side, optimising product listings and analysing market trends to guide marketing strategy and key operational decisions.
- Analysed Etsy Analytics and Google Trends data in Tableau to identify market and seasonal trends and assess pricing and product performance, then refined listings, descriptions and tags using Etsy SEO techniques.
- Grew listing views by 43%, lifted customer engagement by 14% in Q3 2024, and improved visibility in search results.

Key Projects

SALES INTELLIGENCE COPILOT (HACKATHON, 2026)

Claude, Data Analysis, Generative AI, Prompt Engineering, Transcript Analysis, Client Profiling, Evidence-based Insight Generation

- Client call recordings, chat histories and transcripts hold sales insight that is hard to extract at scale.
- Built a tool that turns them into structured, decision-ready client profiles
- Designed prompt-based analysis to detect tone shifts, client priorities, buying signals, objections and relationship risks.
- Produced evidence-based sales guidance with timestamps and supporting quotes to strengthen follow-ups, proposals and account strategy.

30-DAYS 30 INDUSTRIES CHALLENGE (ONGOING)

Cross-Industry Analysis, Business Research, Tableau, R Shiny, Quarto, Power BI, Databricks, Data Storytelling, Problem-solving, Insights and Reporting Analysis

GitHub: <https://github.com/ishitak22/30-days-industry-analytics>

- Set myself a challenge to analyse 30 different industries, building the business context and analytical range expected of a cross-industry analyst.
- For each industry, aimed to research the sector, choose the right data and turn it into actionable insights.
- Analysed the data in R, and built dashboards in Tableau, R Shiny and Power BI with insight write-ups in Quarto in an R app format.
- Building a growing portfolio of industry analyses, each with a dashboard and insight summary, that shows the same analytical method applied across sectors

TIDYTUESDAY DATA VISUALISATION PROJECTS

Data Analysis and Visualisations, R programming, R Shiny, Data Wrangling, Visual Storytelling, EDA, Reproducible Research, Insight Communication

GitHub: https://ishitak22.github.io/IK_Portfolio/

- As part of the #TidyTuesday community, I applied **data wrangling** and **exploratory data analysis** techniques to uncover trends and patterns in diverse datasets.
- These projects allow me to ask thoughtful questions and build interactive dashboards that enabled users to explore data insights using **R Shiny**.
- These projects demonstrate how I independently apply data skills to **real world problems** and **communicate insights clearly**, showing I am ready to contribute in a professional data role.

WALSALL COUNCIL, UK: HOUSING AND HOMELESSNESS NEEDS TO 2040

Data Analysis and Visualisations, R programming, R Shiny, Tableau, Python, Risk Evaluation Techniques, Predictive Modelling, Machine Learning

GitHub: https://github.com/ishitak22/Walsall_Council

- Walsall Council needed to anticipate the housing and homelessness needs of vulnerable communities to 2040.
- Set out to forecast demand and give decision-makers a way to explore the key risk factors.
- Built predictive and machine learning models in R and Python on demographic and socioeconomic data, plus an interactive R Shiny and Tableau dashboard.
- Delivered a forecast to 2040 and a dashboard that supports data-driven policy decisions for vulnerable communities.

Certifications

- Coursera AI Agents and Agentic AI with Python & Generative AI
- NVIDIA Agentic AI
- Databricks Accredited AI Agent Fundamentals
- Databricks Accredited Generative AI Fundamentals
- Databricks AI/BI for Data Analysis
- Databricks Accredited Databricks Fundamentals
- Microsoft Harnessing the Power of Data with Power BI

Education

MONASH UNIVERSITY, CLAYTON VIC – MASTERS OF BUSINESS ANALYTICS (FEB 2022-DEC 2023)

MANAV RACHNA UNIVERSITY, HARYANA INDIA – BACHELORS OF BUSINESS ADMINISTRATION (AUG 2018-JUN 2021)

Specialisations in Finance and Accounting
